

WHAT A DIFFERENCE

Having had the café open over the busy time made such a difference. No longer did there need to be coffee trucks brought in and from what I have heard the food was great too. It certainly made all the difference to the visitors to our township, who definitely do not want to have to cook while they are down here on holiday, all that sort of stuff belongs to when they are back home!

I'm sure most residents have noticed the sign coming into town, that our roads are going to be re-surfaced. This should be commencing on Monday 17th of February and hopefully will be finished about a week later, all going well. We have been assured that the re-sealing will endeavour to produce a surface that is very similar to the present one and not be the usual overall grey to black. Of course, our roads have stood up to the test of time very well. This is mainly due to the concrete edges which were originally installed and have kept the roadway from spreading out sideways.

Regarding my previous Snippets, which noted all the activities available in The Centre, I have had a great deal of positive feedback. This has mainly come from people who had not realized that there were so many activities available. Hopefully, this will lead to greater numbers participating in some of the events.
